Editor and reviewer comments:

Reviewer #1:

1. **Clarity of Purpose:** The purpose of the study is clear, focusing on the criminal law policies regarding prostitution in Indonesia and Sweden. However, consider explicitly stating the research questions or objectives to guide readers through the investigation.
2. **Introduction Enhancement:** The introduction could benefit from providing a more detailed background on the significance of studying prostitution in both Indonesia and Sweden. Include relevant statistics or notable incidents to emphasize the societal impact.
3. **In-depth Comparative Analysis:** While the abstract touches on the comparative approach, the methodology section could elaborate on the specific criteria used for comparing the legal frameworks in Indonesia and Sweden. This would enhance the depth of the comparative analysis.
4. **Data Source Clarification:** The source of data is well-defined, but consider providing examples of specific primary legal materials, secondary legal materials, and tertiary legal materials used. This would lend transparency to the research process.
5. **Cohesiveness in Argumentation:** Ensure that the argumentation and analysis in the main body of the article follow a logical sequence. This will help readers to easily follow the line of reasoning and comprehend the comparative findings.
6. **Addressing Limitations:** It is crucial to address any limitations in the research design or data sources. Acknowledging these limitations enhances the credibility of the study and invites further research avenues.
7. **Explicit Comparative Findings:** Make sure to explicitly present the comparative findings between Indonesia and Sweden. Use tables or charts if applicable to visually represent the differences and similarities in the criminal law policies.
8. **Linking Research to Practical Implications:** Discuss the practical implications of the findings. How can the insights gained from the comparative analysis contribute to improving current policies or addressing challenges related to prostitution in these two countries?
9. **Language and Terminology:** Review the language for clarity and precision. Ensure that legal terminology is used consistently and accurately throughout the article to avoid any ambiguity.

10. Strengthen the conclusion by summarizing key findings and emphasizing their significance. Additionally, provide clear recommendations for policymakers or legal practitioners based on the comparative analysis conducted.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear

Thank you for the efforts to make improvements to the article.  
Based on the reviewers' considerations, the article has, at some point, increased.  
However, article has to improve on a few more points. Hopefully you are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. Contextualization of Prostitution Issues: Delve deeper into the contextualization of prostitution issues in both Indonesia and Sweden. Include socio-economic factors, cultural perspectives, and historical developments that might have influenced the current state of prostitution and its regulation in each country.
2. Utilization of Comparative Legal Theories: Consider incorporating comparative legal theories to underpin the analysis. This could involve discussing how legal traditions or cultural differences impact the formation and application of prostitution laws in Indonesia and Sweden.
3. Discussion on Law Enforcement Challenges: Elaborate on the challenges faced by law enforcement agencies in both countries concerning the implementation of prostitution laws. This could involve discussing practical obstacles, resource constraints, or societal attitudes that impact the effectiveness of these laws.
4. Exploration of Social and Health Consequences: Extend the discussion to include the social and health consequences of the existing prostitution laws in both countries. Analyze how these laws may contribute to or mitigate issues such as human trafficking, the spread of diseases, and the overall well-being of those involved in sex work.
5. Future Research Directions: Conclude the article by suggesting potential areas for future research. This could involve proposing studies that delve into the effectiveness of alternative legal frameworks, the role of public awareness campaigns, or the impact of decriminalization on the regulation of prostitution.
